

SmartPOS

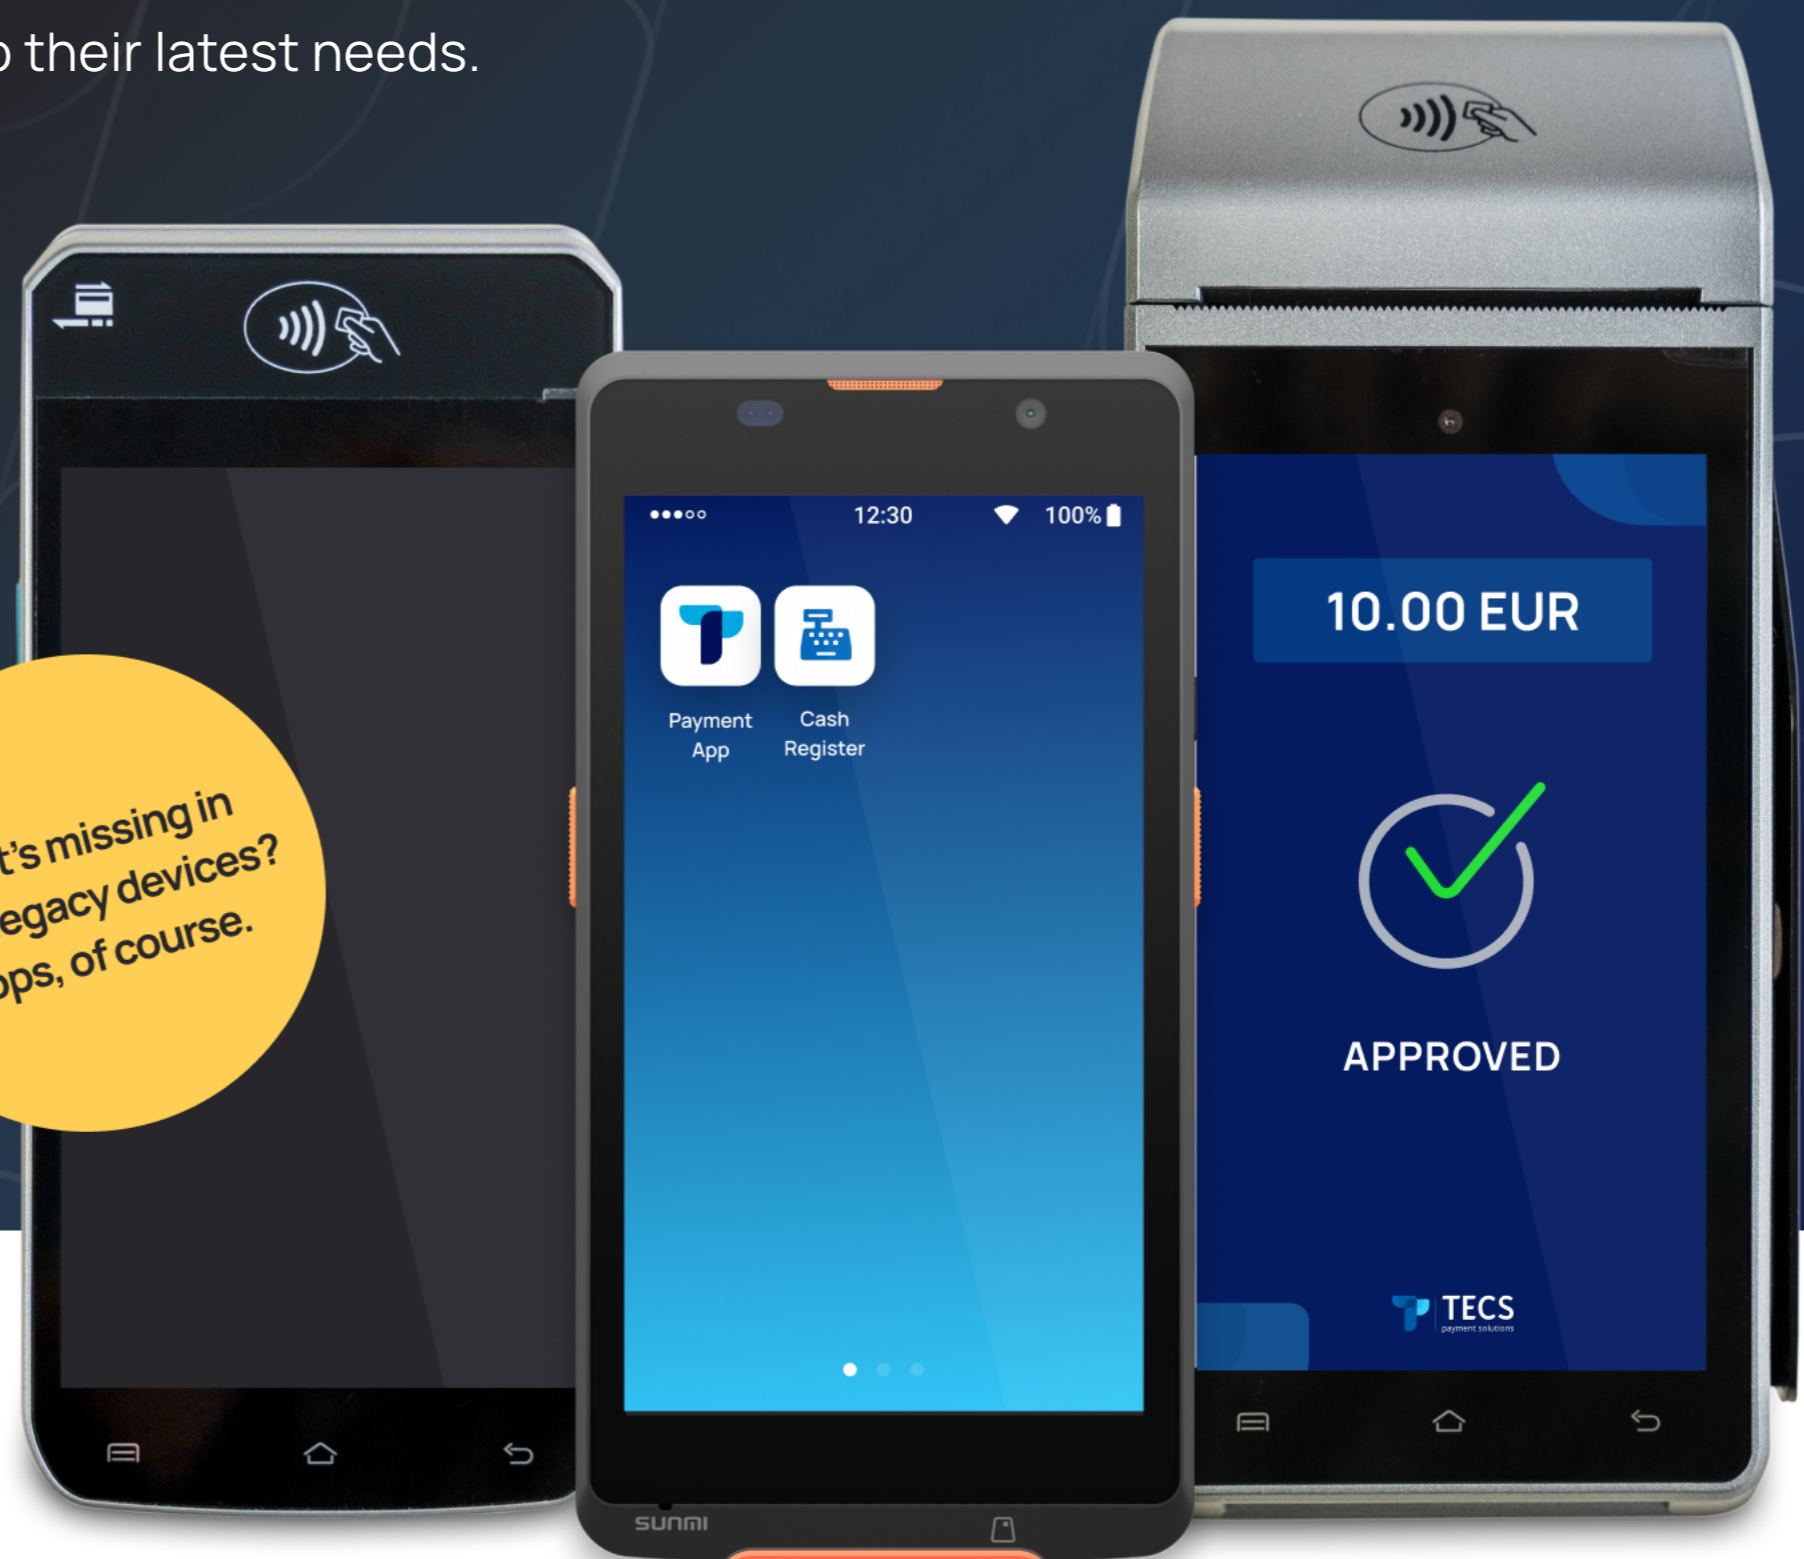

All-in-one, handy & future focused

We provide a **Payments Platform-as-a-Service (PaaS)** that combines secure Android devices with an open, feature rich, and extremely well connected Payments Platform. Service providers like PSP's, ISV's, and ISO's enjoy the scalable platform that is easy to integrate, and flexible to fully adapt to their latest needs.

Their Merchant customers love our seamless omnichannel payment experience, and innovative functionalities, always reliable, fast & secure out of a single source.

Let us take care of all the rest to ensure your business success. Thanks to TECS' fully integrated app store and many more fancy features to enjoy.

What's missing in your legacy devices? Apps, of course.

4 reasons

why our clients love our services?

Meet TECS' SmartPOS - our latest innovation.

Get your job done with a combination of state of the art POS payment technologies and secure Android devices. A perfect fit in terms of simplified application management, easy onboarding and high end performance. Of course this includes seamless integration with the TECS Payment platform.

Benefiting from over 100 innovative payment and loyalty card method integrations makes day to day operation even smarter.

That's what TECS SmartPOS is all about. Simplified and secure smart POS payments – re-imagined for your POS success!

ISVs, ISOs

1. Stay ahead

Smart POS keep's it future proof, via remote key injection, quick and easy remote deployment of additional apps via our white label platform's embedded scheduler. Bulletproof and highly secure!

2. Ignore network flapping

Networks might flicker, no worries about it – as long as full offline-online – switching mode is active. Stay tuned and bring in your revenues however local requirements might look alike.

3. Reduce your service line call volume

Clients won't bother you anymore cause of missing Bluetooth links between payment & POS devices or other such related, starting with dead batteries and ending on different device runtimes.

4. Stay productive

Extra durable batteries help you to drive your business forward, no matter what you do with the all-in-one. It bears with you an entire shift. Go for it!

Merchants

1. Lots of new hires for your events?

Training and onboarding happens within a fingertip, not via a long lasting briefing session.

2. For employees?

Your staff does not like all-in-one devices because tips cannot be handled? SmartPOS with its capabilities can handle a % tip entry or a lump sum either!

3. An experience so easy

Loyalty or prepaid cards are part of the game? So why not use TECS contactless single spot reading capabilities or even combine it with devices' embedded QR code capabilities.

4. Fraud is an issue at your venue?

No longer with smartPOS, with a single fingertip you generate your day closure and the device is ready to launch the next app. For inventory reasons or whatever your multi use cases might look alike. Take a deep breath and remember the times when you still had all those cash handling issues long after lights went out!
