4 reasons

why our clients love our services?

Get to know the TECS payment processing platform. Get your work done in a streamlined way and easily reduce your complexity in day-to-day operations. It's like assembling your own lunch bowl. You choose your preferred ingredients, and we make sure it's not only delicious, but looks good too.

Always with the aim of increasing customer satisfaction based on a reliable and highly secure environment. Make it your scaling game. Keep it simple. **That's what TECS is all about. A simplified but fast payment platform as a service - reimaged for your business success!**

Acquirers

1. Credibility & Security

PCI-DSS, Level 3 certifications and the like are tongue twisters for you? Don't worry about certifications and security issues like PCI-DSS anymore, because TECS takes care of it, always in the latest valid version - that's the deal.

2. Your Product portfolio

From SmartPOS to unattended devices, TECS is a one-stop shop, providing hardware and scaling services in the background. Not to mention running its own app store to meet any requirements that might be a challenge along the way. But it's even getting better. Along with the fully fledged dashboarding we offer API's to connect to your data warehouses or alternatively provide a payment channel controlling tool, our cute baby, we call it "TRACS"

3. Fast integration

A new payment service coming to market? No more sleepless nights, TECS will take care of your merchant's success from implementation design to final certifications. Whatever it takes!

4. White-labeling

You want to grow your business: When you enter a new country, the paperwork to sign an acquiring agreement usually takes longer than the technical implementation of the solution. Thanks to our white-label self-service payment application management platform. At TECS we call it PAM!

ISV's or Resellers

1. Differentiation

Expand your business. Accept alternative payment methods; fleet cards, digital wallets or account-based payments - decide what you need to succeed, we deliver!

2. Innovation

Be fast or even a first mover. Not only should the payment process be a breeze, but so should the implementation of new, fancy devices, such as a self-service kiosk solution or the latest all-in-one mobile payment device with full offline functionality. Vendor agnostic for sure. Make your event a success together with TECS!

3. All-in-one

You are thinking of multifunctional environments. Are you thinking of using multi-purpose devices, e.g. for inventory management, access control or barcode scanning functions? Find the right app, sign and verify it via our app store and distribute your apps whenever it suits you best, easily and reliably via TECS.

4. Unlock comprehensive insights

Your data is your gold. Want to gather more insights to run your business smarter? Use our wide range of API connections to make the most of it. Business intelligence is that easy with TECS!
